Labor Category Description

Specialized IT Consultant

Minimum/General Experience: Requires over 15 years' experience supporting information technology projects, with over 5 years providing specialized IT consulting services expertise. Performs highly specialized and specific technical consulting related to cutting-edge technologies, tools, and techniques. Serves as a top level technical or functional expert supporting special projects and initiatives. Maintains a strong awareness of technical trends in information technology and associated consulting "best practices".

Functional Responsibility: Providing short term support or expertise on assessment and integration of a particular technology, product, tool, technique, or framework, for example, planning for the integration of an IT infrastructure enterprise monitoring tool, assessing agile development project management tools, migrating to an upgraded knowledge management system, or designing IT security compliance and certification strategies.

Minimum Education: Advanced degree and/or relevant specialized certifications related to areas of technical expertise. Training related to IT consulting services, such as organization change management or IT service management frameworks is highly desirable.

IT Security Specialist (Senior)

Minimum/General Experience: Requires ten (10) years' experience. Relevant experience includes, but is not limited to information technology, information security, information systems management. Expert knowledge of ISO, NIST and other common framework mythologies as well as common regulations such as PCI and SOX. Ability to define and implement large scale security programs. Experience in developing security documentation to include but not limited to SSP, SRTM, CT&E.

Functional Responsibility: Duties will include define, develop and adherence to best practices and policies. Ensure compliance with all government required security standards and regulations Review and develop SSPs, relationships w/ ISSM. Review or provide system security recommendations assessments, and analysis. Coordinate, collaborate and communicate the development of Security policies, procedures, a unified framework, standards and guidelines based on knowledge of best practices and compliance requirements.

Minimum Education: Bachelor's degree and ten years of experience in Security Policy Advisor or Subject Matter Expert roles.

Senior IT Specialist

Minimum/General Experience: Requires seven (7) year of experience as an IT specialist or analyst. Analytical skills to understand a project's scope and approach and then translate that into deliverable Products, applications, programs, or computer systems. Maintains organization's effectiveness and efficiency by defining, delivering, and supporting strategic plans for implementing information technologies.

Functional Responsibility: Duties will include maintaining and supporting all daily technological

Functions of the organization. Preparing and maintaining detailed internal and external documentation. Maintain and manage systems. Ensures compliance with all local, state and federal mandates in regards to privacy, information security and data integrity. Accomplishes financial objectives by forecasting requirements; preparing an annual budget; scheduling expenditures; analyzing variances; initiating corrective action.

Minimum Education: A Bachelor's degree or an additional four (4) years general IT experience.

Junior IT Specialist
Minimum/General Experience: Requires two (2) year of experience as an IT specialist or analyst. Analytical skills to understand a project's scope and approach and then translate that into deliverable Products, applications, programs, or computer systems. Maintains organization's effectiveness and efficiency by defining, delivering, and supporting strategic plans for implementing information technologies.

Functional Responsibility: Duties will include maintaining and supporting all daily technological Functions of the organization. Preparing and maintaining detailed internal and external documentation. Maintain and manage systems. Ensures compliance with all local, state and federal mandates in regards to privacy, information security and data integrity.

Minimum Education: A Bachelor's degree or an additional three (3) years general IT experience.

EXPERT CONSULTANT III
Minimum/General Experience: Requires over 15 years' experience in one or more specialized aspect of computerized information systems (for example, IT security, IT project management, etc.), including at least seven years of experience in the relevant area of specialization.

Functional Responsibility: Duties may include providing expert services and leadership in specialized technical areas and business practices related to computerized information systems, generally providing technical expertise in application of state-of-the-art information technology and associated business processes.

Minimum Education: Master's degree or an additional two years general information technology experience. If the area of expertise is new state-of-the-art computer technology, experience must be consistent with the age of the technology. Vendor certification in computerized information system development project management, RDBMS, development language, telecommunication technology, or other specialty may be substituted for advanced degree or experience requirements.

EXPERT CONSULTANT II
